

Baktolan[®] protect+ pure

Skin regeneration and skin protection
for the hands

Replenishing water-in-oil-in-water emulsion for the protection against aqueous solutions and for dry, highly stressed skin.

Baktolan[®] protect⁺ pure

Product properties

- innovative formula (W/O/W emulsion)
- protects against water-soluble substances
- promotes the skin's regeneration
- can be used under gloves
- strengthens the skin barrier
- very good skin compatibility
- fragrance, silicone and colourant-free

Composition

Aqua, paraffinum liquidum, isopropyl palmitate, cetearyl alcohol, polyglyceryl-2 dipolyhydroxystearate, propylene glycol, cetearyl glucoside, C12-15 alkyl benzoate, bisabolol, petrolatum, phenoxyethanol, PEG-30 dipolyhydroxystearate, PEG-40 stearate, methylparaben, hamamelis virginiana water, propylparaben, ethylparaben, isobutylparaben, butylparaben, alcohol denat.

Compatibility

Baktolan[®] protect⁺ pure does not interfere with the efficacy of selected BODE hand disinfectants.

- Hygienic hand disinfection acc. to EN 1500 after use of Baktolan protect⁺ pure.

The previous use of Baktolan[®] protect⁺ pure does not have an effect on the perforation rate of common glove materials such as latex and nitrile.

Areas of application

Baktolan[®] protect⁺ pure is used where highly stressed or even cracked skin needs to be regenerated and strengthened. At the same time, Baktolan[®] protect⁺ pure protects the skin when performing tasks with aqueous solutions. Additionally, Baktolan[®] protect⁺ pure can fight skin irritations that might occur by using gloves. Baktolan[®] protect⁺ pure is particularly suitable for daily application:

- in clinics and primary health care
- in nursing and geriatric care
- in chemical, pharmaceutical and food processing areas
- in utility departments
- in cleaning services

Directions for use

Take a small amount of Baktolan[®] protect⁺ pure and rub it into clean hands. Pay particular attention to the areas between the fingers and the nail beds.

Under gloves the normal and usual hand sweat can not evaporate. This leads to a skin softening and disfunction of the physiological protection function of the skin. Baktolan[®] protect⁺ pure can be used under gloves to fight skin irritations that might be caused by wearing gloves. In addition to skin protection, Baktolan[®] protect⁺ pure can be used for the care of normal or stressed and cracked skin.

Characteristics

Baktolan[®] protect⁺ pure is a fragrance-free water-in-oil-in-water emulsion, combining the properties of a quickly absorbed O/W emulsion and a protecting and maintaining W/O emulsion.

Its bisabolol content supports the skin regeneration and strengthens the natural protective function of healthy skin.

Baktolan[®] protect⁺ pure is easily spread and quickly absorbed without leaving a bothersome greasy film.

Baktolan[®] protect⁺ pure acts in three ways:

- promotion of the regeneration of stressed skin
- high protective effect when working with aqueous solutions
- strengthening of the skin barrier

Stability

After opening: 12 months

Presentation

25 millilitre tube, 100 millilitre tube

Note: The recommendations regarding our preparations are based on scientific tests and are given in good faith. More detailed recommendations, e.g. regarding material compatibility, are only possible in particular cases. Our recommendations are without obligation and do not constitute a warranty. They do not preclude a company's own testing for the intended purposes and processes. In this respect we cannot accept any liability. This complies with our general conditions of sale and supply.
