

# Stellisept<sup>®</sup> med foam

## Antiseptic body cleansing foam

**Antiseptic body cleansing with comprehensive effect against MRSA and ORSA.**

## Product properties

Stellisept® med foam is an antiseptic cleansing foam with replenishing properties and a broad spectrum of antiseptic effect. The preparation is suitable for MRSA eradication in accordance with the Robert-Koch Institute recommendation. The effect of Stellisept® med foam is tested according to European standards. It meets the requirements of EN 1499 and EN 13727 and provides a comprehensive effect against national epidemic MRSA strains and clinical MRSA isolates.

By means of selected ingredients the cleansing foam possesses a very good skin compatibility so that rinsing after the use of Stellisept® med foam is not necessary.

The foam is produced without propellant, thereby an unpleasant cold feeling on the skin is avoided. The foam is created by simply pressing the foam pump of the dispenser.

- comprehensive activity against national epidemic MRSA strains and clinical MRSA isolates
- bactericidal activity
- no rinsing after use
- skin nurturing properties
- skin-friendly pH value of approx. 5.5
- free from colourants
- free from perfume
- very good skin and hair compatibility and good mucous membrane tolerability

## Composition

Aqua, Propyl Alcohol, Panthenol, PEG-40 Hydrogenated Castor Oil, Sodium Citrate, Didecylidimonium Chloride

## Microbiological activities

Stellisept® med foam is bactericidal (incl. MRSA/ORSA).

## Areas of application

Stellisept® med foam is suitable for the following areas of application:

- antiseptic whole-body washing in case of MRSA/ORSA  
Stellisept® med foam possess both a proven comprehensive activity against MRSA and an excellent dermatological tolerability. Stellisept® med foam's efficacy against 6 national epidemic MRSA strains and a selection of clinical isolates and strains was proved in tests analogous to the European EN 13727 method: within 60 seconds Stellisept® med foam (50 %) achieved sufficient reduction factors against all tested strains.
- pre operative body washing  
Stellisept® med foam with its gentle cleansing and skin caring formulation is ideal for the pre-operative body washing of patients prior to surgical procedures.

- for care homes and older patients  
The antiseptic and skin care properties of Stellisept® med foam make it ideal for the gentle cleansing of patients with older skin, who are confined to bed, or who suffer from incontinence (including double incontinence). Because of its moisturising properties, Stellisept med foam can also help prevent the formation of pressure sores.

## Directions for use

- antiseptic whole-body washing  
Apply Stellisept® med foam directly to the skin and the hair or to a washcloth or sponge. Cleanse the body areas intensively. Rinsing after use is not necessary due to the excellent skin and mucous membrane compatibility. Ensure that skin folds, axillae and the gaps between fingers and toes are sufficiently wetted with the preparation. A cycle for the antiseptic whole-body wash in case of MRSA/ORSA takes in general 5 to 7 days.

## Note

Avoid eye contact. Keep out of reach of children.

## Dosage

	Exposure time
EN 1499	60 s
Whole-body washing in case of MRSA/ORSA	60 s

## Chemical-physical data

Appearance	clear liquid
Smell	soapy, fresh
pH value (conc.)	5.5 – 6.5
Density (20 °C)	0,991 g/cm <sup>3</sup>
Durability after opening	approx. 1 year

## Presentation

200 ml pump foamer, 500 ml and 1000 ml bottles.
