

Surfaces

Dosing table

Instructions to prepare a ready-to-use solution of a surface disinfectant product. The quantity of use solution consists of concentrate and tap water (e.g. to receive 8 litres of a 0.5 % solution, you have to add 40 millilitres of the concentrate to 7.96 litres of tap water). Do not add any cleaner without manufacturer's approval. In case work solution is soiled, stop use immediately and prepare a fresh solution.

Litres of solution \ Concentrate in %	0.25 %	0.5 %	0.75 %	1 %	1.5 %	2 %	2.5 %	3 %	4 %	10 %
1 litre	2.5 ml	5 ml	7.5 ml	10 ml	15 ml	20 ml	25 ml	30 ml	40 ml	100 ml
2 litres	5 ml	10 ml	15 ml	20 ml	30 ml	40 ml	50 ml	60 ml	80 ml	200 ml
3 litres	7.5 ml	15 ml	22.5 ml	30 ml	45 ml	60 ml	75 ml	90 ml	120 ml	300 ml
